

Creating Prompts

For each of the tasks below, you need to write a prompt that accomplishes the task. As a result, you need to provide the prompt and the implications of its use.

1. Generate a paragraph in English about Linus Torvalds contributions to software development and technology innovation.
2. Modify the text from the previous task to infuse a tone reminiscent of William Shakespeare's style, emphasizing dramatic and suspenseful elements in Torvalds's journey through the tech industry.
3. Convert the received text from the previous task .to md format with some predefined structure.
4. You need to write a letter with constructive negative feedback regarding a software developer's performance. Your task is to craft a highly polite letter that clearly outlines specific areas where the developer made mistakes, along with the impact of these issues on the project and the reasons for your concerns. If the letter lacks sufficient politeness or clarity, go through several iterations to improve it.
5. The tasks in this block must be completed using the meeting transcripts from the **Project transcripts.docx** file.
 - a. Conduct an initial analysis of meetings. It is necessary to determine the specialization of each meeting participant. Based on the results of the analysis, you need to create a list of meeting participants. Next to each, indicate the name and potential specialization. Be sure to describe the format of the response you expect as a result of your prompt.
 - b. Carry out self-assessment of each meeting: what was the meeting about, who participated, what was decided to do as a result of the meeting, top 3 insights, top 3 challenges. Be sure to describe the format of the response you expect as a result of your prompt.
 - c. Create a general summary of all meetings for each participant: name of the participant; summary what he was saying. In addition, it is necessary to find out who generated ideas, who criticized it, who supported it, who was neutral. Be sure to describe the format of the response you expect as a result of your prompt.
 - d. Create a description of the project:
 - What the project is about?
 - What technologies are used in the project for the frontend, backend, data storage, etc.?

- What problems does the project has, what is planned to be implemented in the near future?
 - e. Based on the results of the three meetings, write the text of the letter for all participants. His tone should be optimistic and businesslike. In the text of the letter, summarize the meetings, the next steps to be taken. Don't forget to thank each participant. Also indicate the date of the next meeting. Be sure to describe the format of the response you expect as a result of your prompt.
6. Based on the Wikipedia article about Go ([https://en.wikipedia.org/wiki/Go_\(programming_language\)](https://en.wikipedia.org/wiki/Go_(programming_language))), create an English-language quiz about the Go language. The quiz should have a limited number of questions (you have to specify it yourself): multiple answer options (one correct), multiple answer options (several correct), true/false.

Determine the number of answer options and how to determine which option is correct.

After generating the quiz, check its quality. If the quality is poor, create a new version of the quiz.
